

Not just better . . .

# Simply Better

Streamline your operations while controlling your costs. There's a simpler, better alternative to multi-stage metal pretreatment . . .

## PlafORIZATION™

is the **ONE-STEP** pretreatment process that works at room temperature. Simply treat your parts for one minute, drip/blow them off, dry them and they are ready for painting. It couldn't be easier.

Plus, PlafORIZATION's™ simplicity and ease-of-use have a host of economic and environmental benefits that directly translates to your bottom line:

- > No sludge
- > No rinse
- > No waste
- > No hazardous by-products
- > No daily bath check
- > No need to change the bath

And with natural gas prices going through the roof, room-temperature PlafORIZATION™ is the perfect solution to soaring energy costs.

**Less is more. Find out how PlafORIZATION™ can simplify your pretreatment operations. Call for our information Package today.**
